Thank you for choosing a Hama product. Take your time and read the following instructions and information completely. Please keep these instructions in a safe place for future reference. If you sell the device, please pass these operating instructions on to the new owner.

1. Explanation of warning symbols and notes

Risk of electric shock   ⚠

This symbol indicates a risk of electric shock from touching product parts carrying hazardous voltage.

Warning   ⚠

This symbol is used to indicate safety instructions or to draw your attention to specific hazards and risks.

Note   ⓘ

This symbol is used to indicate additional information or important notes.

2. Package contents

• Digital tuner DIT1010BT
• Telescopic antenna
• Power supply unit
• Stereo Cinch L/R output
• Remote control
• 2 x AAA batteries
• These operating instructions

3. Safety instructions

• The product is intended for private, non-commercial use only.
• Do not use the product in the immediate vicinity of heaters, other heat sources or in direct sunlight.
• Only use the article under moderate climatic conditions.
• Use the product only for the intended purpose.
• Do not use the product in a damp environment and avoid splashing water.
• Be considerate. High volumes can disturb or interfere with your surroundings.
• Protect the product from dirt, moisture and overheating and use it in dry rooms only.
• As with all electrical products, this device should be kept out of the reach of children.
• Children must not play with the device. Cleaning and user maintenance must not be carried out by children without supervision.
• Do not use the product in areas in which electronic products are not permitted.
• Be considerate. High volumes can disturb or interfere with your surroundings.
• Do not drop the product and do not expose it to any major shocks.
• Do not operate the product outside the power limits specified in the technical data.
• Keep the packaging material out of the reach of children due to the risk of suffocation.
• Dispose of packaging material immediately in accordance with the locally applicable regulations.
• Do not modify the device in any way. Doing so voids the warranty.

Risk of electric shock   ⚠

• Do not open the device or continue to operate it if it becomes damaged.
• Do not use the product if the AC adapter, adapter cable or power cable is damaged.
• Do not attempt to service or repair the product yourself. Leave any and all service work to qualified experts.

Warning – Batteries ⚠

- When inserting batteries, note the correct polarity (+ and - markings) and insert the batteries accordingly. Failure to do so could result in the batteries leaking or exploding.
- Only use batteries (or rechargeable batteries) that match the specified type.
- Before you insert the batteries, clean the battery contacts and the polar contacts.
- Do not allow children to change batteries without supervision.
- Do not mix old and new batteries, or batteries of different types or from different manufacturers.
- Remove the batteries from products that are not being used for an extended period (unless these are being kept ready for an emergency).
- Do not short-circuit batteries.
- Do not charge batteries.
- Do not burn batteries.
- Keep batteries out of the reach of children.
- Never open, damage or swallow batteries or allow them to enter the environment. They can contain toxic, environmentally harmful heavy metals.
- Remove spent batteries from the product and dispose of them without delay.
- Avoid storing, charging or using the device in extreme temperatures and extremely low atmospheric pressure (for example, at high altitudes).

4. Informations and notes before getting started

Note ⓘ
A detailed description of the UNDOK app and all of its functions can be found in our UNDOK guide at:

www.hama.com -> 00054895 -> Downloads

Note ⓘ
- For best reception, ensure that the antenna is fully extended and vertical.
- Try various different positions if necessary to get the best reception.

Preparing the remote control for use
Open the cover on the battery compartment. This can be found on the back of the remote control and can be opened by sliding in the direction indicated.
The extent of delivery includes two AAA batteries which must be inserted into the battery compartment for the remote control to work. When inserting the batteries, ensure that they are inserted with the correct polarity. The relevant polarity (+ / -) is marked inside the battery compartment.

Network connection/ Preparing the Internet connection
You can integrate this tuner into a network. To receive Internet radio, an Internet connection is required on this the network.

WLAN connection (wireless network)
- Ensure the router is switched on, is functioning correctly and that there is a connection to the Internet.
- Activate your router's WLAN function.
- To ensure the correct functioning of your WLAN connection, follow your router's operating instructions.
- Then proceed as described under point 5, "Getting started".

Note ⓘ
Use only original accessories (or accessories approved by Hama) to avoid damage to the product.

5. Getting started

Note - optimising reception ⓘ
This product has an antenna connection for external antennas with a coaxial connection. A suitable antenna that allows DAB, DAB+ and FM reception is included in the extent of delivery. Alternatively, you can use an active or passive antenna to improve the reception or to adapt it to your requirements.

Please note:

- Always pull the antenna out completely.
- We recommend you adjust the antenna vertically to ensure optimal reception.

5.1 General notes on use

5.1.1 Switch On/Off / Standby

• Press [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to switch on the tuner.
• Press and hold [**POWER/VOLUME/ENTER/NAVIGATE**] (9) for 3 seconds to switch the tuner off (standby).
• To completely switch off the device, disconnect it from the power supply.

5.1.2 Navigation and controls

• After pressing a shortcut button, navigate through the menu items using.
• Select the individual menu items by turning [**POWER/ VOLUME/ENTER/NAVIGATE**] (9).
• Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).

5.1.3 Volume adjustment / mute

• Turn the volume up (right) or down (left) by turning [**POWER/VOLUME/ENTER/NAVIGATE**] (9) accordingly.
• Press [✗] on the remote control to mute the tuner.
• Press [✗] again on the remote control to reset the volume to the value before it was muted.

5.2 Connecting and starting up

Warning ⚠

• Only operate the product from a socket that has been approved for the device. The socket must be installed close to the product and must be easily accessible.

• Disconnect the product from the power supply using the On/Off switch – if this is not available, unplug the power cord from the socket.

• If using a multi-socket power strip, make sure that the total power consumption of all connected devices does not exceed the power strip's maximum throughput rating.

• If you will not be using the product for a prolonged period, disconnect it from mains power.

• Connect the power supply to the mains connection (1) on the back of the tuner.
• Connect the network cable to a properly installed and easily accessible network socket.
• Wait until the tuner has initialised fully.
• Press [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to switch on the tuner.

Note – switching on for the first time ⓘ

• The Setup Wizard starts up automatically when the device is turned on for the first time.

• The default used language is English.

• You can skip the Wizard and start it up again later in German.

Once the product has been connected to mains power, initialisation takes place. The tuner is started.
To assist you with the first-time setup of the tuner, a **Setup Wizard** is provided.

5.3 General notes on use

Notes on use ⓘ

• These operating instructions always relate to operation using the controls on the device. Functions that are only usable by **app** or remote control are explained separately.

• For information on the buttons on the remote control and their functions (⏏) that correspond to the control buttons on the device, please see the **Controls and displays**.

• [**OK**] and the navigation button ► on the remote control correspond to pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).

• The navigation button ◄ on the remote control corresponds to [⮌] (4) on the front of the tuner.

• The navigation buttons ▲/▼ correspond to turning [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to the left and right on the front of the tuner.

• When a selection among menu items is to be made (such as **YES** or **NO**), the one currently selected has a light-coloured background fill.

• In menus offering a variety of different options (such as Equalizer, Update, and so on), the currently selected option is marked with #.

Entering passwords, search terms, and so on.
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to select each individual number and/or letter and confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
- To make corrections, select [**BKSP / <-**] and confirm. The last input made is deleted.
- To cancel input, select [**CANCEL**] and confirm.
- Once your input is complete, select [**OK**] and confirm to finish.

Additional information
Depending on the operating mode and stations available, pressing [🛈] (6) displays additional information:

- **Description**
  Indicates the radio station, the current programme, contents, subjects, etc.

- **Genre**
  The genre (music style) of the station is shown.

- **Reliability / signal strength**

- **Bit rate**
  The currently received digital bit rate of the received station is displayed.

- **Channel information**

- **Current time**

- **Today's date**

5.4 Initial setup

When it is first connected to the power supply, a list of available languages for the menu is displayed. Proceed as follows to
set your desired language:

Desired language, for example German (Deutsch)
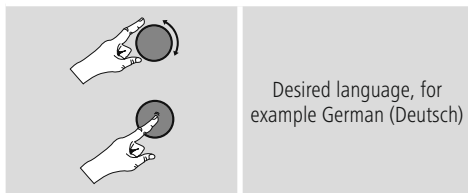

Setup wizard
Once a language has been set, the first-time setup can be carried out via the setup wizard (**YES**)/ or skipped (**NO**):

YES / JA

NO / NEIN
Note – Starting up with or without the setup wizard   🛈

- We recommend using the setup wizard (**YES**) for quick and easy first-time setup (setting of the time, date, internet connection, etc.).

- If you wish to skip setup with the setup wizard anyway, choose **NO**. All of the settings configured by the setup wizard can be configured or changed individually in the **System settings** menu. Alternatively, you may restart the setup wizard at any time.

- Next, choose **YES** or **NO** to define whether or not the setup wizard should start automatically next time the tuner is started up. You are in the **main menu**.

Date/ Time
12/24-hour format
• **Auto update**
  • **Update from DAB/ FM**
    If automatic time and date adjustment is
    activated, the device receives time and date
    information from the station over the FM/DAB/
    DAB+ radio network. This is the best way to
    ensure that the clock will run accurately and the
    alarm will trigger at the correct time, even after
    power outages.
  • **Update from Internet**
    Choose this option to set the time and date
    automatically via the Internet connection. Also
    set the time zone of your current location and, if
    desired, turn (**ON**) automatic adjustment between
    summer time and winter time.
  • **No update**
    The time and date (**DD-MM-YYYY**) must be set
    manually; no automatic calibration takes place.

**Network wizard – Configuration of network
connection**

> **Note – Reference to a different part of**   ⓘ
> **these operating instructions**
> Because this chapter is extensive, please follow the
> directions in section **16.2.1 Network wizard –**
> **Configuration of Internet connection / Search**

Once the network wizard has finished,the setup wizard
is finished as well. The display shows a message to this
effect.
Confirm completion by pressing [**POWER/VOLUME/
ENTER/NAVIGATE**] (9), to go to the **main menu**.

6. Connections

> **Note**   ⓘ
> • Connections that are established by means of an
>   optical signal cable are less affected by electrical
>   or magnetic interference than connections that are
>   established via a 3.5 mm audio cable.

6.1 Connection via Optical-OUT

You can connect your loudspeaker to the tuner via the
digital audio output, for example, and play its audio
signals via the loudspeaker.

> **Note**   ⓘ
> • Switch the tuner off before connecting a device to it.
> • Before connection, remove the safety caps from both
>   ends of the optical signal cable.
> • Do not bend or crush the cable.

• For playback via the optical audio connection, connect
  an optical signal cable to the tuner's optical audio output
  (12) and the loudspeaker's optical audio input.
• Press [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to
  switch on the tuner.
• The tuner's audio signal is now output via the
  loudspeaker.

6.2 Connection via LINE OUT

You can connect your loudspeaker to the tuner via the
analogue audio output, for example, and play its audio
signals via the loudspeaker.

> **Note**   ⓘ
> • Switch the tuner off before connecting a device to it.
> • Do not bend or crush the cable.

• For playback via the analogue audio connection, connect
  a 3.5 mm RCA cable to the tuner's analogue audio
  output (11) and the loudspeaker's analogue audio input.
• Press [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to
  switch on the tuner.
• The tuner's audio signal is now output via the
  loudspeaker.

7. Main menu / modes

This devices supports radio reception via the Internet, DAB/DAB+ and FM.

The main menu contains the various operating modes as well as other options that are explained separately in the following chapters:

7. Internet radio
8. Podcasts
9. Spotify Connect
10. DAB / DAB+
11. FM
12. Bluetooth
14. System settings

Select amongst the available operating modes by repeatedly pressing [**M**] (2).
During playback, the current operating mode appears at the top left-hand edge of the screen.

8. Internet radio

Note ⓘ

If necessary, it is possible to switch providers in order to make all features and functions of the product available.

From the main menu or after pressing [**M**] (2) repeatedly, activate (**Internet radio**) mode on the tuner.

Alternatively, press [**IR**] on the remote control to switch directly to this operating mode.

8.1 Station search

The tuner offers various ways to search for stations.

• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate through the individual search functions and their options.
• Once you have found a station you like, confirm by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9). The tuner starts playing the selected station.

8.1.1 Search by country or region

To search for a station by continent, country and region, proceed as follows:
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Station list" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Countries" menu item. Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).

Once you have restricted the results to a certain country or region, select a station from the complete list or from a list sorted by genre.

8.1.2 Search by genre

To search for a station of a certain genre or subject focus, proceed as follows:
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Station list" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Discover" menu item. Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).

Once you have restricted the results to a certain genre, select a station from a list of all stations available, or from a pre-selected list, or from a list sorted by country.

8.1.3 Search by name

If you know the name of the desired station, you can search for it directly:
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Station list" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Search" menu item. Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).

Enter the complete name, or a part thereof, in the input screen and select [**OK**] to start the search. You receive a list of all available stations whose names contain the search key.

8.1.4 Popular stations

You can find a selection of the most popular stations as follows:
• Press [⚙] (1) to access the Settings menu.

- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Station list" menu item.
- Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Popular" menu item and select your preferred station.

8.1.5 Local stations

To search for stations from your own country (the country in which the tuner is currently located), proceed as follows:
- Press [✿] (1) to access the Settings menu.
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Station list" menu item.
- Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Local <Country>" menu item. Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to your preferred station.

Note   🛈

Replace the <Country> placeholder with the country you are currently located in.

You can filter this local list by genre, or select a station from the complete list, or select from a pre-selected list.

8.2 Favourites (local)

You can save up to 20 of your favourite stations for quick and direct access.

8.2.1 Assigning the favourites shortcut buttons

- Set the station that you would like to save to a favourites memory slot.
- Once the station is playing, press and hold the relevant shortcut button for around 3 seconds.
- The selection will be confirmed by the display showing "Program (1-4, depending on the shortcut button) saved".
- During playback, the favourite memory slot is displayed at the bottom of the screen.

Note   🛈

Favourites cannot be deleted. If all 20 station memory slots are filled and you wish to save a new station, choose one of the occupied slots. The station in this slot will be overwritten with the new station.

8.2.2 Calling up shortcut button favourites

To call up a stored station, press the corresponding shortcut button.

8.2.3 Assigning the list of favourites (1-20)

- Set the station that you would like to save to a favourites memory slot.
- If the station is playing, press and hold [▣] (5) for approx. 3 seconds until the Favourites list opens.
- Navigate to the preferred memory slot and confirm your selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
- The selection will be confirmed by the display showing "Program (1-20, depending on the memory slot) saved".

8.2.4 Calling up a station from the Favourites list (1-20)

- Press [▣] (5) to call up the Favourites list.
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the preferred station and confirm your selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).

9. Podcasts

Podcasts are programs on various topics and include, for example, talk shows, news and much more. Podcasts can be downloaded from the Internet.
There are normally approximately 10,000 programs available. Similarly to radio stations, the tuner makes it possible to filter a large number of podcasts, or to search the entire database for a matching result.

From the main menu or after pressing [M] (2) repeatedly, activate **Podcasts** mode on the tuner:

9.1 Podcast search

9.1.1 Search by country or region

To search for a podcast by continent, country and region, proceed as follows:
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Podcasts list" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Countries" menu item and select your preferred station.

Once you have restricted the results to a certain country or region, select a station from the complete list or from a list sorted by genre.

9.1.2 Search by format (subjects or categories)

To search for a podcast by continent, country and region, proceed as follows:
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Podcasts list" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Discover" menu item and select your preferred station.

9.1.3 Search by name

If you know the name of the desired podcast, you can search for it directly:
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Podcasts list" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Search" menu item.

Enter the complete podcast name, or a part thereof, in the input screen and select [**OK**] to start the search. You receive a list of all available podcasts whose names contain the search key.

9.2 Favourites (local)

You can save up to 20 of your favourite stations for quick and direct access.

Note ⓘ

Favourites cannot be deleted. If all 20 station memory slots are filled and you wish to save a new station, choose one of the occupied slots. The station in this slot will be overwritten with the new station.

9.2.1 Assigning the list of favourites (1-20)

• Set the station that you would like to save to a favourites memory slot.
• If the station is playing, press and hold [🖪] (5) for approx. 3 seconds until the Favourites list opens.
• Navigate to the preferred memory slot and confirm your selection by pressing [**POWER/VOLUME/ENTER/ NAVIGATE**] (9).
• The selection will be confirmed by the display showing "Program (1-20, depending on the memory slot) saved".

9.2.2 Calling up a station from the Favourites list (1-20)

• Press [🖪] (5) to call up the Favourites list.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the preferred station and confirm your selection by pressing [**POWER/VOLUME/ENTER/ NAVIGATE**] (9).

10. Spotify

Spotify Connect gives you access to millions of songs. You can listen to them on your tuner, on the go using your smartphone, or on your PC or smartphone.

Requirements:
- You must have the Spotify app installed on your Android or iOS device.
- It can be downloaded from the Play Store or the Apple App Store. Once the app is installed, start it and log into your account (or, if you do not have an account, register a new one).
- You will require a Spotify account (see www.spotify.de for more information).
- The tuner must be on the same network as the Android or iOS device with the Spotify app installed.

Use:
- In the Spotify app, start playback of a playlist or track as usual.
- The usual playback information is displayed, such as the album cover, track, etc.
- At the bottom edge of the screen, the Spotify Connect logo 🔲 is shown next to **Available devices**.
- Choose 🔲 **Available devices** to access an overview of all devices available on the network.
- Select the tuner. The audio is now played back on the tuner.

Once the connection has been established, the Spotify Connect logo 🔲 and the device designation are displayed in green.

After successful initial connection:
From the main menu, or after pressing [**M**] (2) repeatedly, activate **Spotify (Spotify Connect)** mode on the tuner:

- Press [**POWER/VOLUME/ENTER/NAVIGATE**] (9) (or [▶] on the remote control) to start playback.
- Alternatively, you can also control the tuner - e.g. skip to a different track or adjust the volume - using the remote control, the app, or the Spotify app.

11. Digital radio (DAB/DAB+)

The tuner receives all established digital radio frequencies in the range of 174 MHz to 240 MHz (band III, channel 5A to 13F).
From the main menu or after pressing [**M**] (2) repeatedly, activate **DAB (DAB radio)** operating mode on the tuner.

Alternatively, press [**DAB**] on the remote control to switch directly to this operating mode.

11.1 Search / Automatic search

The automatic DAB channel search scans the DAB band III for available stations. After the station search, all interference-free stations are saved in alphabetical order. In Stations list a ? is displayed in front of the station names of stations found during a previous scan but which cannot currently be received.
The automatic DAB station search starts automatically when DAB mode is started for the first time; it is indicated by **Scanning…** and a status bar on the display.

If you would like to start the search again, proceed as follows:
- Press [⚙] (1) to access the Settings menu.
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Full scan" menu item.
- Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
- Wait until the search process has completed.
- The available stations are now displayed in the list of stations.

11.2 Station list

You can call up the station list in DAB mode at any time. To do this, proceed as follows:
- Press [↩] (4) during playback to navigate through the available stations in ascending alphabetical order using [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
- Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
- The device starts playback automatically.

Note   ⓘ
The list of stations contains all stations that were found on the last station search. A further station search - as described in **11.1 Search / Automatic search** - can be started. A station's reception quality depends on factors such as the weather, location and orientation of the aerial. If a station shown in the list of stations is not available, changing the orientation of the aerial or the location of the radio may help. Stations that are not available can be removed from the list of stations as described in **11.3 Edit station list**.

11.3 Edit station list

To remove stations that are not currently in the reception area, from your station list, proceed as follows:
- Press [✿] (1) to access the Settings menu.
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Delete inactive stations" menu item.
- Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).

If you answer **YES**, then all currently unavailable stations will be removed from the station list.

Note   ⓘ
To keep the list of stations up to date, we recommend updating the list regularly with a full station search (see **11.1 Search / Automatic search**).

11.4 Favourites (local)

You can save up to 20 of your favourite stations for quick and direct access.

Note   ⓘ
Favourites cannot be deleted. If all 20 station memory slots are filled and you wish to save a new station, choose one of the occupied slots. The station in this slot will be overwritten with the new station.

11.4.1 Assigning the list of favourites (1-20)

- Set the station that you would like to save to a favourites memory slot.
- If the station is playing, press and hold [⊟] (5) for approx. 3 seconds until the Favourites list opens.
- Navigate to the preferred memory slot and confirm your selection by pressing [**POWER/VOLUME/ENTER/ NAVIGATE**] (9).
- The selection will be confirmed by the display showing "Program (1-20, depending on the memory slot) saved".

11.4.2 Calling up a station from the Favourites list (1-20)

- Press [⊟] (5) to call up the Favourites list.
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the preferred station and confirm your selection by pressing [**POWER/VOLUME/ENTER/ NAVIGATE**] (9).

11.5 DRC (Dynamic Range Control)

Some DAB network radio stations support a volume control feature that actively takes effect during playback. If the volume suddenly increases, DRC automatically lowers it. If the volume suddenly becomes quieter, DRC automatically raises it. The same happens when playback is suddenly quiet. The tuner then increases the volume again.

DRC high: total equalisation of different volumes. Strong compression can audibly reduce the dynamics of a music title.

DRC low: partial equalisation of different volumes. More subtle compression, without too much loss of dynamics.

DRC off: no equalisation

Proceed as follows to do the settings:
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Volume adjustment" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9) and select your desired setting.

11.6 Station sequence

By default the tuner sorts stations into alphabetical order. You can also sort by signal strength or ensemble. To change the sorting order, proceed as follows:
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Station sequence" menu item.
• Choose between "Alphabetic", "Provider" and "Valid" and confirm your selection by pressing [**POWER/ VOLUME/ENTER/NAVIGATE**] (9).

12. FM

From the main menu or after pressing [**M**] (2) repeatedly, activate **FM (FM radio)** operating mode on the tuner.

Alternatively, press [**FM**] on the remote control to switch directly to this operating mode.

Stations that broadcast additional information regarding the station and the programme, are highlighted on the display with an RDS icon (Radio Data System).
This additional information is displayed by pressing [ⓘ] (6).

12.1 Search setting

The search setting allows you to determine whether stations with low signal strength are ignored during the automatic search. Proceed as follows:
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Search settings" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
• To have the search run stop only at stations with high signal strength, select **Strong stations only**. Otherwise, the search run will stop at every station for which a signal is received.

Note   ⓘ
By default, the "Strong stations only" method is selected.

12.2 Search / Automatic search

• Press [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to start a station search.
• The tuner stops the search and starts playback when it finds a station.
• Pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9) again continues the search process until the next station is found.

12.3 Manual station search

When you make station settings manually, you can define the desired frequency yourself and tune into stations that were ignored during automatic station search because their signals were too weak.
- Press [↵] (4) to switch to the manual station settings.
- Turn [**POWER/VOLUME/ENTER/NAVIGATE**] (9) (left: - 0.05 MHz / right: + 0.05 MHz) until the desired frequency is displayed. Wait a moment until playback of the received station signal begins.
- Press [↵] (4) again to exit the manual station settings.

12.4 Favourites (local)

You can save up to 20 of your favourite stations for quick and direct access.

Note 🛈

Favourites cannot be deleted. If all 20 station memory slots are filled and you wish to save a new station, choose one of the occupied slots. The station in this slot will be overwritten with the new station.

12.4.1 Assigning the list of favourites (1-20)
- Set the station that you would like to save to a favourites memory slot.
- If the station is playing, press and hold [⊞] (5) for approx. 3 seconds until the Favourites list opens.
- Navigate to the preferred memory slot and confirm your selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
- The selection will be confirmed by the display showing "Program (1-20, depending on the memory slot) saved".

12.4.2 Calling up a station from the Favourites list (1-20)
- Press [⊞] (5) to call up the Favourites list.
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the preferred station and confirm your selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).

12.5 Audio setting

For some stations with a weak signal, quality can be slightly improved by playing them in mono quality. You can enable this function in the menu, and the tuner will automatically switch to mono reception when signal quality is poor. To change the audio setting, proceed as follows:
- Press [✿] (1) to access the Settings menu.
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Audio setting" menu item.
- Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9) and select your desired setting.

13. Bluetooth®

You can pair your devices with the tuner using Bluetooth and use them as a playback device. You can control playback directly on the terminal device. You can adjust the volume on the tuner, as well.

Note – Bluetooth® 🛈
- Check whether your mobile device (smartphone, tablet PC. etc.) is Bluetooth-capable.
- Note that the maximum range for Bluetooth® is 10 metres without obstacles such as walls, people, etc.
- The connection may be disrupted by other Bluetooth® devices/connections in the vicinity.
- The tuner can only ever be paired with one device at a time.
- Note that compatibility depends on the supported Bluetooth® profiles as well as the Bluetooth® versions being used. (See: Technical data in the operating instructions for the respective device)

Press [**M**] (2) repeatedly to activate Bluetooth® operating
mode on the tuner:

| | [M] |

Alternatively, press [**BT**] on the remote control to switch
directly to this operating mode.

13.1 Bluetooth® pairing

- Make sure that your Bluetooth® capable terminal device
  is switched on and that Bluetooth® is activated.
- Press [✿] (1) to access the Settings menu.
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to
  navigate to the "Setup Bluetooth" menu item.
- Open the Bluetooth® settings on your device and
  wait until the list of found Bluetooth® devices shows
  DIT1010SBT.
- If necessary, start searching for Bluetooth® devices on
  your device.
- Select **DIT1010SBT** and wait until the tuner is shown as
  connected in the Bluetooth® settings of your device.
- Your device is also shown as connected on the tuner
  display.
- Start and control audio playback using the controls on
  your device.

Note - Bluetooth® password 🛈

Some devices require a password in order to connect to
another Bluetooth® device.

- If your device requests a password to connect to the
  loudspeaker, enter **0000**.

### 13.2 Automatic Bluetooth® connection (after successful pairing)

- Devices that have already been paired with the tuner are
  stored automatically on the tuner.

Note - connection impaired 🛈

After the tuner and device have been paired, a
connection is established automatically. If the Bluetooth®
connection is not established automatically, check the
following:

- In your device's Bluetooth® settings, check that
  DIT1010SBT is connected. If not, repeat the steps
  listed under Bluetooth® pairing.
- Check that your device and the tuner are less than 10
  metres apart. If not, move them closer together.
- Check whether obstacles are impairing the range. If
  so, move the devices closer together.

13.3 Terminating the Bluetooth® connection

	[✿]
	Main menu
	↓
	Terminate connection
- Then turn [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to
  select the **YES** button and confirm the termination of the
  Bluetooth connection by pressing [**POWER/VOLUME/
  ENTER/NAVIGATE**] (9).

14. Sleep

The tuner has a timer function, which switches the device to standby mode after a pre-defined length of time, regardless of its operating mode.
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Main menu" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Sleep" menu item.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to set the timer value.
• Confirm your setting by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
• If the sleep timer is activated, this is indicated in the playback screen by [**zᶻᶻ**].

15. Alarm

The tuner has two individually adjustable alarm times.

15.1 Alarm settings

You can access the alarm settings as follows:
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Main menu" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Alarm" menu item.

Alarm 1 and alarm 2 are configured identically and allow two separate alarm times to be saved. Select Alarm 1 or 2 and confirm your selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
Set the following details using [**POWER/VOLUME/ENTER/ NAVIGATE**] (9).

Mode:
Choose when the alarm is to activate:
Off – Daily – Once – Weekdays – Weekends

Time:
First choose the hour, then the minute at which the alarm is to activate.

Mode:
Set whether you wish to be woken by an alarm tone (**buzzer**), by **DAB**, **FM** or by the **Internet radio**.

Programme:
If you selected **Internet radio/ DAB/ FM**, choose which station you wish to be woken with. You can choose any of the 20 favourite slots or the **Last listened**.

Volume:
You can set the volume at which the alarm sound should be played. This setting makes it irrelevant how loud you last listened to the tuner.

Saving:
Select **Off / On** to complete your alarm settings.

Note ⓘ
It is recommended to allow the device to update the time automatically. This ensures that the time is always correct even if there is a separation of power supply – for example a power cut.

15.2 Activating / deactivating the alarm
• Confirm the menu item **Save** in alarm settings to activate the alarm.
• Disable the alarm by setting the **Mode** to **Off**.

15.3 Stopping the alarm/ Snooze function
• If the alarm is triggered, press and hold [**POWER/ VOLUME/ENTER/NAVIGATE**] (9) for approx. 3 seconds to stop the alarm.
• If the alarm is triggered, press[**POWER/VOLUME/ ENTER/NAVIGATE**] (9) to enable snooze.
• The alarm turns off for the selected time interval (5/10 minutes) before activating once again.

16. System settings

You can modify all settings and access important information about the tuner in the System settings.
16.1 Equaliser

The equaliser allows you to adjust the sound of the tuner to suit your preferences by amplifying or reducing the amount of bass or treble in the audio.
You can choose from preconfigured profiles, adjusted to suit a variety of music genres, or create your own custom profile.

• To set the equaliser, proceed as follows:

System settings
↓
Equaliser

• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to select one of the pre-configured profiles.
• To create your own equaliser profile, choose the **My EQ setting** option.
• This takes you to the **bass**, **treble** and **loudness** settings (volume amplification).
• To change a value, press [**POWER/VOLUME/ENTER/NAVIGATE**] (9) on the relevant selection and change the values by turning [**POWER/VOLUME/ENTER/NAVIGATE**] (9) left or right. If playback is already started when you modify these settings, you can hear the changes in the audio immediately.
• Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9) again.
• Once you have made all the settings, press [↩] (4) on the tuner and confirm that the settings are to be saved by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• To use the new profile, choose the **My EQ** option.

16.2 Internet settings

16.2.1 Network wizard – Configuration of Internet connection / Search

The **network wizard** helps you set up a connection between the tuner and the Internet. More methods of configuration and detailed information are amplified subsequently.
• You can start the **Network wizard** as follows:
• Press [✿] (1) to go to the system settings.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Internet settings" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Network wizard" menu item.

• When the wizard is started, the tuner searches for WLAN (WiFi) connections and then shows a list of the available networks.
• Turn [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to switch between the networks found. At the bottom of the list are options to restart the search ("[**Rescan**]") or configure the connection yourself ("[**Manual config**]").
• If your network is not found or the SSID (Service Set Identification, that is, the name of your network) is not shown, the network may be hidden or out of range. In this case, try manual configuration.

16.2.2 Wireless network connection (WLAN)

Depending on the network, there are a number of ways to connect to it.
Networks that support connection via WPS (Wi-Fi Protected Setup) are identified in the list with the prefix "[**WPS...**]".
Other connections are either open networks or connections protected with a PSK, or Pre-Shared-Key.

WPS / PSK / open network connection
WPS allows simple and nevertheless protected connection of the tuner to the network. Two options are available for this purpose:
The connection can be set up by means of PBC, or Push-Button Configuration, or by the PIN procedure, in which the web interface of your router prompts you to enter a randomly generated
sequence of numbers.

PBC setup
• Select your desired network. (Indicated by the prefix "[**WPS...**]")
• In the WPS menu, then select the **"Push Button"** option and confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• Press the WPS button on your router or current access point. This can often be done using the web interface, as well.
• Consult the operating instructions of your router or access point for details.
• Once the procedure has also been initiated on the router / AP, the tuner should connect with the access and the network connection should be available.
• Alternatively, PBC setup can be initiated from the tuner's Internet settings:
• Press [✿] (1) to go to the system settings.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Internet settings" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "PBC Wlan setup" menu item.

PIN setup
- Select your desired network. (Indicated by the prefix "[**WPS...**]")
- In the WPS menu, choose the PIN option and confirm your selection by pressing [**POWER/VOLUME/ENTER/ NAVIGATE**] (9).
- The tuner generates an 8-digit code, which must be entered into the web or user interface of your router or access point.
- Consult the corresponding handbook for details on configuring the router or access point.

Skip WPS / Pre-Shared Key (PSK) configuration
- Choose the item **"**[**Skip WPS**]**"** to proceed to key entry.
- On networks that do not support WPS, you will go directly to key entry.
- In the input screen, enter the whole key and then confirm with the **OK** button.
- If the key was entered correctly, the tuner connects to the access point and establishes the Internet/network connection.

Note ⓘ
- Often the Pre-Shared Key is printed on the back of the router or access point.
- When entering the key, take notice of capitalisation.

Open network / unsecured network

Note ⓘ
- We recommend against establishing unsecured connections and advise you to always protect your network against unauthorised access.
- If you plan to use an open network, you just have to select the network from the list of available networks and confirm. The tuner then connects immediately with the access point.

16.2.3 Manual configuration of network connection – wireless (WLAN)
- To manually configure a network connection, proceed as follows:
- Press [⚙] (1) to go to the system settings.
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Internet settings" menu item.
- Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
- Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Manual settings" menu item.

Manual configuration wireless (WLAN) – DHCP enable
- Select the option **"Wireless"**.
- Selection the option **"DHCP enable"**.
- In the input screen, enter the whole SSID (network name) and then confirm with the **OK** button.
- Now choose the security standard used by the network. This can be found in the configuration options of your router or access point.
- Depending on the encryption used, you may need to enter the network key before the connection is established.

Manual configuration wireless (WLAN) – DHCP disable
This method corresponds to configuration with an active DHCP server (**manual configuration wireless (WLAN) - DHCP enabled**), however you must also enter the network information such as the IP address, subnet mask, gateway address and DNS (primary and secondary). Find this information in the web interface of your router or access point, or if this information is already correctly entered, you can confirm the entry. The tuner now attempts to establish the connection.

16.2.4 View settings

This is where you will find all of the key information about all network connections that the tuner is currently using, or which have been set up, e.g.: MAC address, WLAN region, DHCP enable / disable, SSID, IP address, subnet mask, gateway address, DNS (primary/secondary), etc.

• Press [⚙] (1) to go to the system settings.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Internet settings" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Show settings" menu item.

16.2.5 Network profile

The tuner automatically saves all successful network connections (profiles). This means that re-establishing these connections (for example, after the tuner was disconnected from the power supply) does not require you to re-enter the network access information.

To remove network profiles individually, proceed as follows:
• Press [⚙] (1) to go to the system settings.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Internet settings" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Remove network profiles" menu item.

• Select the relevant network profile and press [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to remove it.
• Confirm the prompt querying if you want to delete the network profile with **YES**.
• A profile that is currently active, or that is in use, cannot be deleted.

Note ⓘ
• Before giving or selling the tuner to someone else, we recommend performing a factory reset.
• This will completely and permanently delete all network information and connections stored on the device.

16.3 Time/ Date settings

To access the time settings, proceed as follows:
• Press [⚙] (1) to go to the system settings.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Time and date" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Update settings" menu item.

Auto update
Update from Internet
Choose this option to set the time and date automatically from the internet. Set the timezone of your current location (**Set timezone**) and, if desired, turn on automatic adjustment between summer time and winter time (**Daylight savings -> ON**).

Update from DAB / FM
If automatic time and date adjustment is activated, the device receives time and date information from the station over the FM/DAB/DAB+ radio network. This is the best way to ensure that the clock will run accurately and the alarm will trigger at the correct time, even after power outages.

No update
The time and date (**DD-MM-YYYY**) must be set manually; no automatic calibration takes place.

Time/ Date settings
Set the date (**DD-MM-YYYY**) and time (**hh:mm**) manually using [**POWER/VOLUME/ENTER/NAVIGATE**] (9).

Format
Choose between 12 and 24 hours format.

16.4 Language

The first time it is used, the tuner's default language is English. To change tuner's menu language, proceed as follows:
• Press [⚙] (1) to access the Settings menu.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Settings" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).
• Use [POWER/VOLUME/ENTER/NAVIGATE] (9) to navigate to the "Language" menu item. Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to select your preferred system language.
• The language setting currently selected is marked with an asterisk (*).

Note   ⓘ
• The following languages are available: English, German, Danish, Dutch, Finnish, French, Italian, Norwegian, Polish, Portuguese, Spanish, Swedish, Turkish

16.5 Factory reset

To reset the tuner to the factory default settings (delivery condition), proceed as follows:
• Press [⚙] (1) to go to the system settings.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Factory settings" menu item.
• Confirm the following prompt with **YES** to reset the tuner to the factory default settings. All settings made previously are deleted.
• To abort the deletion process, press [↩] (4) or select **NO**.

Note   ⓘ
Resetting to the factory default settings can remedy some problems and malfunctions.

• However, all settings made previously, such as equaliser and favourites, permanently deleted.

16.6 Software update

Improvements and new features are always constantly being developed for the software used in our tuners to resolve potential errors, increase the range of functions, and so on. We recommend that you always install any available updates on your tuner.

Proceed as follows:
• Press [⚙] (1) to go to the system settings.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Software update" menu item.

• If you select **Automatic updates** (**YES**), the tuner will automatically check for new software updates on a regular basis. (Recommendation)
• Choose **Check now** to manually start a check for software updates.

Warning   ⚠
• Make sure that the device has a stable power supply before you start a software update.

• Power supply failure during a software update can cause irreparable damage to the tuner.

Update port
The update port allows you to load software updates manually. The procedure for automatically updating the software can be found under **16.6 Software update.**

Note   ⓘ
• Available updates and instructions on how to install them can be found at: www.hama.com -> 00054895

16.7 Info

To check the current software version, radio ID and device designation of your tuner, proceed as follows:
• Press [⚙] (1) to go to the system settings.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Info" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ ENTER/NAVIGATE**] (9).

16.8 Setup wizard

You can restart the setup wizard (see **Setup wizard**) at any time as follows:

[⚙]

System settings
⬇
Setup wizard

16.9 Lighting

The backlight can be configured for each operating mode (Operation Mode, Standby Mode) separately.

Proceed as follows:
• Press [⚙] (1) to go to the system settings.
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to navigate to the "Lighting" menu item.
• Confirm the selection by pressing [**POWER/VOLUME/ENTER/NAVIGATE**] (9).
• Use [**POWER/VOLUME/ENTER/NAVIGATE**] (9) to adjust the brightness.

Note ⓘ
The choice of lighting mode impacts on the power consumption.

16.10 Auto standby

Note ⓘ
• For reasons of environmental protection and to save valuable raw materials, the tuner automatically switches to standby mode after 15 minutes, as soon as the playback has been switched to a very low volume or if the tuner has been muted.

To enable or disable this function, proceed as follows:

[⚙]

System settings
⬇
Auto standby
17. UNDOK – Everything in the palm of your hand

Powered by

UNDOK

The UNDOK app, developed by Frontier Silicon, gives you full control of radios and speakers from your smartphone. Whether you are setting up the device for the first time, specifying settings for the equaliser or managing your favourite stations – UNDOK lets you access all the features from your smartphone or tablet, thereby offering you greater convenience.

17.1 First-time setup of the device with UNDOK

The first time you switch on an UNDOK-enabled product from Hama, or when you have set it to the factory settings, it creates a micro access point – a separate Wi-Fi network that you can connect to with your tablet or smartphone.

17.1.1 Procedure for iOS users

- Open the UNDOK app on your iPhone or iPad
- Tap the **Set up audio system** menu item
- Make sure that the tuner or speaker is in SETUP mode. Set the product to the factory settings, if necessary. Confirm the query with **Next**
- The UNDOK app now prompts you to connect to the product's Wi-Fi network using the iPhone/iPad settings – to do so, switch to the system settings on your iPhone and select the Wi-Fi network (for example, Setup Hama **DIT1010BT**). Then return to UNDOK and tap **Next**
- Now choose a name for the tuner (for example, Office **DIT1010BT**) and confirm your entry with **Next**
- This takes you to the date and time settings – here you set the time format, time source and time zone.
- The various network configuration options are then offered to you (where applicable, Wi-Fi, WPS). Tap the desired method; UNDOK switches to the next window
- Depending on the selected method, you can now select and configure the desired WiFi network, or set up a WPS connection.
- The tuner finally connects to the network and you can use the device in UNDOK by pressing **Use my audio system**

17.1.2 Procedure for Android users

- Open the UNDOK app on your tablet or smartphone
- Tap the **Set up audio system** menu item
- Make sure that the tuner or speaker is in SETUP mode. Set the product to the factory settings, if necessary. Confirm the query with **Next**
- On the following page, you will find a list of all available Wi-Fi networks as well as the suggested audio systems; the Hama product (for example, Setup Hama **DIT1010BT**) should be listed here. Tap the corresponding Wi-Fi network.
- Now choose a name for the tuner (for example, Office **DIT1010BT**) and confirm your entry with **Next**
- This takes you to the date and time settings – here you set the time format, time source and time zone.
- The various network configuration options are then offered to you (where applicable, Wi-Fi, WPS). Tap the desired method; UNDOK switches to the next window
- Depending on the selected method, you can now select and configure the desired WiFi network, or set up a WPS connection.
- The tuner finally connects to the network and you can use the device in UNDOK by pressing "Use my audio system"

18. Care and Maintenance

- Only clean this product with a slightly damp, lint-free cloth and do not use aggressive cleaning agents.
- If you do not plan to use the product for a prolonged period, turn off the device and disconnect it from the power supply. Store it in a clean, dry place away from direct sunlight.

19. Warranty Disclaimer

Hama GmbH & Co KG assumes no liability and provides no warranty for damage resulting from improper installation/mounting, improper use of the product or from failure to observe the operating instructions and/or safety notes.

20. Recycling Information

Note on environmental protection:

After the implementation of the European Directives 2012/19/EU and 2006/66/EU in the national legal system, the following applies: electrical and electronic devices as well as batteries must not be disposed of with household waste. Consumers are obliged by law to return electrical and electronic devices as well as batteries to the designated public collection points or to the point of sale at the end of their service lives. Detailed information on this topic is defined in the national laws of the respective country. This symbol on the product, the operating instructions or the package indicates that a product is subject to these regulations. By recycling, reusing the materials or other forms of utilising old devices/batteries, you are making an important contribution to protecting our environment.

21. Declaration of Conformity

C E Hama GmbH & Co KG hereby declares that the radio equipment type [00054895] is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: www.hama.
com -> 00054895 -> Downloads.
