GET STARTED – QUICK GUIDE

This User Manual is intended for the daily use of the tuner. See the Installation Manual for installation.

Advanced OneRemote circuitry has been added to this tuner, OneRemote DabWiFi7, enabling it to be part of a remotely controlled Bang & Olufsen system. Complete control is obtained with a Bang & Olufsen remote control terminal.

- DabWiFi7 is a beo-compatible tuner.
- DabWiFi7 may be controlled by any Bang & Olufsen system remote terminal from 1988 and on.
- DabWiFi7 may be also controlled via the free app UNDOK in iPhones, iPods, iPads or in Android phones and tablets. Using UNDOK the DabWiFi7 can be controlled from all over the house.

DabWiFi7 may be connected to any Bang & Olufsen system and controlled directly by Bang & Olufsen remotes.

When switching on the DabWiFi7 with a Bang & Olufsen remote the Bang & Olufsen system is switched on too and the input with the DabWiFi7 automatically selected.

If the DabWiFi7 is to be used only for handling DAB+, FM channels or music via Bluetooth, no further installation is required.

DabWiFi7 is connected to the system input that is selected by pressing **AMEM** or **ATAPE** on the Bang & Olufsen remote.

If the Bang & Olufsen system has no **AMEM** or **ATAPE** operated input available, the DabWiFi7 needs to be connected to a different input socket and reprogramming of the DabWiFi7 is required accordingly. **See the Installation Manual.**

- *Bang & Olufsen link-systems do not only allow for listening to system sources from the main room from any connected link room, but also for controlling them remotely. Thus, a link connected kitchen speaker plays music from the main room. DabWiFi7 may be part of that system, controlled via WiFi. See the Installation Manual.*
