Not all Bang & Olufsen equipment responds to numeric commands. Using the Direct Mode option is recommended.

**List of Contents**

Source & Option selection.

DabFM2 is equipped with a 7 pin DIN DataLink cable for connection to Bang & Olufsen equipment. Thus an adaptor cable is required for connection to equipment not having a DIN input socket. See below examples and the **Option Programming** section page 8.

Connect directly

Connect using a OneRemote adaptor type 39207438

BeoSound 4

Connect using a OneRemote adaptor type 39207437

Connect using a OneRemote adaptor type 39207496

Bang & Olufsen TV

Connect using a OneRemote adaptor type 39207434 and a Beolink converter

BeoSound 5

BeoSound 4

Connect using a OneRemote adaptor type 39207432 and a Beolink converter

Bang & Olufsen TV

Getting Started

This OneRemote DabFM2 tuner has been designed for operation in a Bang & Olufsen remote control system allowing full control with a Bang & Olufsen remote control terminal either directly or via connection to Bang & Olufsen equipment.

Thus the tuner is BeoLink compatible.

Direct Mode or CableLink Mode

The OneRemote DabFM2 tuner is connected to Bang & Olufsen equipment via the 7-pin DIN cable with or without adaptor, and through option programming it may be controlled as follows:

1. **Via the tuner's built in IR-receiver, "Direct Mode"**
   Direct Mode is used when connection to an input with control data is not possible.

2. **Via the cable connected Bang & Olufsen equipment, "CableLink Mode"**
   CableLink Mode is used only when connection to an input with control data is possible.

Factory Settings

The factory setting is for "Direct Mode" and manual power control.

The factory setting for input socket and selected source is:

Remote control	Source
Beo4, Beo5 or Beo6	N.MUSIC, A.MEM2 or TAPE2
Beolink 1000	SHIFT A.TAPE

If the DabFM2 tuner is connected to a *different* input, the option should be programmed accordingly.

Installation

1) Connect the power supply.
2) Connect an antenna.
3) Turn the power switch on, located on the cabinet.
4) Select option and complete option programming, if required.
5) Connect the tuner to the correct input socket on the Bang & Olufsen equipment.
6) Select the corresponding source on the remote control terminal.
7) Turn on the tuner manually, if it is not in the automatic power up mode.
8) Select and program your favorite stations.

Connection to Bang & Olufsen Equipment

This OneRemote DabFM2 tuner may be connected to **any** Bang & Olufsen BeoSound, BeoCenter, BeoMaster, BeoSystem or BeoVision TV and controlled with a Bang & Olufsen remote control terminal, but it may also be connected to equipment of any other brand and still be controlled with the Bang & Olufsen remote control terminal.

Through the years Bang & Olufsen equipment has had input sockets added, removed and renamed. A newer Bang & Olufsen remote control has the button N.MUSIC, which is identical to SHIFT A.TAPE or A.TAPE2 on older remotes.

Below tables are showing available input sockets and their designation on various Bang & Olufsen equipment. The tables below also show the source that has to be selected to open a given input.

Thus with identified Bang & Olufsen equipment and the selected input socket the required option for the tuner to be operable may be determined. Some input sockets allow for the CableLink option to be selected, whereas most of the newer audio equipment requires the Direct Mode option to be used.
The Direct Mode Option:

The tuner is controlled directly with the Bang & Olufsen remote control terminal.
Control from a linkroom is not possible, although the tuner may be listened to there.

The CableLink Option:

The tuner is controlled with the Bang & Olufsen remote control terminal through the connected Bang & Olufsen equipment sending control data via the connection cable. The tuner may be controlled from any linkroom too.

CableLink
Direct Mode

*The CableLink option allows for the tuner to be listened to **and** controlled from any linkroom.*

*The Direct Mode option allows for the tuner to be listened to but **not** controlled from any linkroom. The Direct Mode option works in any Bang & Olufsen set up, but the tuner's IR receiver is not plasma safe.*

Antenna Connection

The OneRemote DabFM2 tuner may be connected to any antenna designed for FM and the DAB reception, if the supplied one is not sufficient.

- o If the FM signal strength is not sufficient the reception will be noisy.
- o If the DAB signal strength is not sufficient the reception is varying from disturbing "bubbles" to complete quietness.
- o If no signal is received the display indicates N/A.

Automatic Power Up and Down

As default factory setting the tuner is manually powered up and down with the **STOP** button. As the display is automatically dimmed 10 seconds after any operation, powering the tuner down is not a strict requirement.

If automatic powering up and down with the source selection is desired, programming a specific option allows for that.

Option Code	Function
Option 990	The tuner can only be powered up and down, using the **STOP** button.
Option 991	The tuner automatically powers up and down.

Important Info about the Automatic Power Mode.

When the automatic power option has been set, the tuner turns on and off automatically with the source selection. But if the tuner's clock has not been set, automatic power up and down is NOT possible.

The clock is automatically set 10-30 seconds after power has been applied to the tuner, provided a DAB station has been received. Thus the automatic power option cannot be used if the tuner is switched off the mains regularly.

Menu

Pressing ▶▶ enters the tuner's main Menu.

Use the ▲ ▼ buttons to select one of the sub menus:

- Manual scan
- Contrast
- System reset
- Software version

Option Programming

Option programming is required only when installing the tuner. The programming is performed with a Bang & Olufsen remote control terminal by initiating a 5 button sequence within 8 seconds after powering up the tuner.

When powering up the tuner the red control LED flashes for 8 seconds, and the programming has to be carried out before the control LED stops flashing. When entering a button the timeout is prolonged with another 8 seconds.

If not successful the operation may be repeated. Programming starts by pressing `LIGHT` and ends by pressing `●`. All options have 3 digits to be entered in between.

Option 106 is entered like this:

<div align="center">

`LIGHT` *1 `1` `0` `6` `●`

</div>

Control LED Indications

Red/green flash
By initial power up the LED starts flashing red/green, indicating that the tuner is in Option Programming mode, i.e. an option may be entered.

The Option Programming Mode is terminated after 30 secs. or prior hereto, if any command except for `0` - `9` , `●` or `LIGHT` is received.

Red
The tuner is powered down.

Green
The tuner is powered up or the tuner is searching for a signal to set the clock.

Intermittently turned off
The LED turns off very briefly as a command handshake indicator.

*1 If using a Beolink1000 remote control, LIGHT must be replaced with SHIFT-LINK.*

Source & Option Selection

The following tables show the available input sockets on various Bang & Olufsen audio and video products, how to select them using a remote control terminal and what the corresponding option program of the One Remote DabFM2 tuner should be.
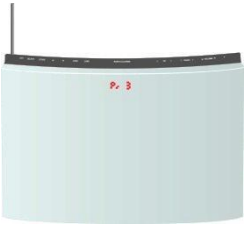

The OneRemote DabFM2 tuner has to be programmed with the right option to operate correctly:

	Input Socket	Source Selected	Direct Option	CableLink Option	Remarks
BeoSound 5	MasterLink	VTAPE VMEM	-	410	If the MasterLink socket is not used, the DabFM2 tuner might be connected and operated via a BeoLink Converter.
		DTV SAT	-	416	
		VAUX	-	412	See page 15 for details on connection of the BeoLink Converter 1611.

	MasterLink	`RADIO` etc.	-		If the MasterLink socket is not used, the DabFM2 tuner might be connected and operated via a BeoLink Converter. See page 15 for details on connection of the BeoLink Converter 1611.

Connection via a BeoLink Converter 1611/ 1612.

The OneRemote DabFM2 tuner may be connected to a Bang & Olufsen stand-alone audio or video master, TV, via a BeoLink Converter using MasterLink and the AAL inputs.

Connected to an audio master and programmed as a "video source" the DabFM2 may be selected as that, VMEM as an example. Connected to a video master and programmed as an "audio source" the DabFM2 may be selected as that, ATAPE as an example. Notice that the Bang & Olufsen equipment has to be programmed in option 2. See the relevant Bang & Olufsen user guide.
	Input Socket	Source Selected	Direct Option	CableLink Option	Remarks
BeoLink Converter 1611 or 1612 used with a Bang & Olufsen audio master and the DabFM2.	AAL	VMEM VTAPE	-	410	The DabFM2 connects to the BeoLink Converter with a OneRemote VSNUT adaptor cable, type 39207434.
	AAL	VAUX	-	412

	AAL	DTV SAT	-	416	
	The BeoLink Converter 1611 connects to a stand-alone Bang & Olufsen audio master with a MasterLink cable. Connection of more Bang & Olufsen equipment might create control conflicts.				

	Input Socket	Source Selected	Direct Option	CableLink Option	Remarks
BeoLink Converter 1611 or 1612 used with a Bang & Olufsen TV and the DabFM2.	AAL	AMEM ATAPE	-	402	The DabFM2 connects to the BeoLink Converter with a OneRemote ASNUT adaptor cable, type 39207432.
	AAL	CD	-	404	
	AAL	NRADIO PHONO	-	406	
	AAL	RADIO	-	408	
	The BeoLink Converter 1611 connects to a stand-alone Bang & Olufsen TV with a MasterLink cable. Connection of more Bang & Olufsen equipment might create control conflicts.				

Connection via a BeoLink Active in any Link Room

The OneRemote DabFM2 tuner may be connected to a Bang & Olufsen BeoLink Active with a vacant 'PC' socket.

Thus active speakers in any link room allow for the installation of the DabFM2 tuner and the opportunity of having a local radio source controlled directly with the Bang & Olufsen remote control terminal.

	Input Socket	Source Selected	Direct Option	CableLink Option	Remarks
BeoLink Active	PC	**PC** **SHIFT** **STORE**	118	-	The DabFM2 connects to the BeoLink Active with a OneRemote PCSNUT adaptor cable, type 39207436.

Connection to a 21 Pin AV Socket on any Bang & Olufsen TV.

	Input Socket	Source Selected	Direct Option	CableLink Option	Remarks
All B&O TV models **BeoVision 10** **BeoVision 8** **BeoVision 7** **BeoVision 6** **BeoVision 4** **BeoVision 3** **BeoVision 1** **BeoSystem 3** **Avant models** **LX models** **LE models** **LS models** **L models** **MX models** **ME models**	Scart AV1 - AV6 *NOT the DECODER input!!*	`VMEM` `VTAPE`	110	410	The input is a scart socket, a 21 pin AV socket.
