Setting the OneRemote Volume Option

When the ▮ TV ▮ key is pressed, the TV powers up automatically and is turned on in the TV mode.

If a Bang & Olufsen audio master is in the room, it is possible to use it and its speakers for handling the TV sound.

The options in the table below determine how the One Remote RMB4 handles the volume control.

These options also allow for the powering up of B&O devices, when ▮ TV ▮ is selected. The audio output from the TV must be wired to the audio master input using a Line to DataLink or Line to RCA Phono plugs cable. Moving the TV sound to the speakers of the audio master improves the sound quality significantly.
